

MTP®

The search for the highest quality fiber optic assembly ends at Priority!

The MTP® is an MPO compatible connector that provides quick and reliable connection for up to 12 optical fibers. Two MTP® connectors are mated using a low-profile bulkhead or blind mateable backplane adapter. Connection integrity and mechanical robustness are provided by the spring-action side latch housing of the adapter. The MTP® incorporates the MT-Style multifiber ferrule.

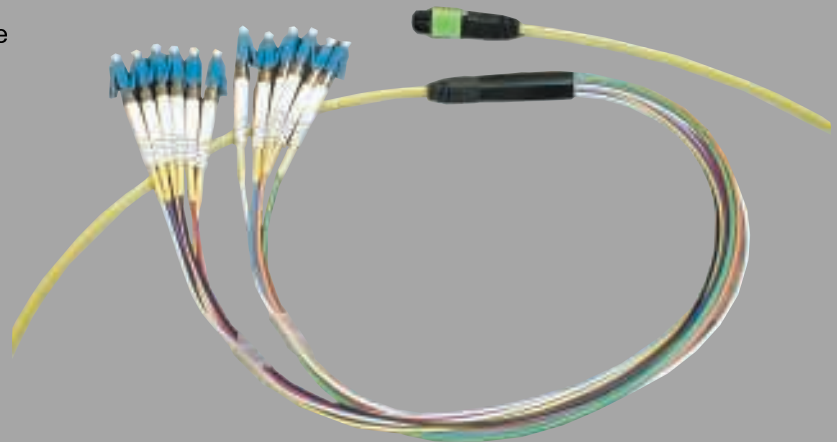

- High-density interconnect replacing up to 12 singlemode connectors and sleeves
- Singlemode and multimode color-coded housings
- Alignment achieved with high precision guide pins
- Hybrid MTP assemblies available

MTP-LC

Make the **PRIORITY** Connection!

The search for the highest quality fiber optic assembly ends at Priority!

The MTRJ connector is a small form factor connector composed of two fibers in one ferrule. MTRJ connectors offer lower cost, increased installation simplicity and an increased packing density for both electronics and cable management.

- Two fibers in one connector
- Multimode and Singlemode versions
- Snag Proof design
- Mates and unmates as easily as a telephone plug
- Hybrid assembly options available with our Patented Framesaver assembly
 - ST-MTRJ
 - SC-MTRJ
 - FC-MTRJ
