

## “Telco” Type Assemblies

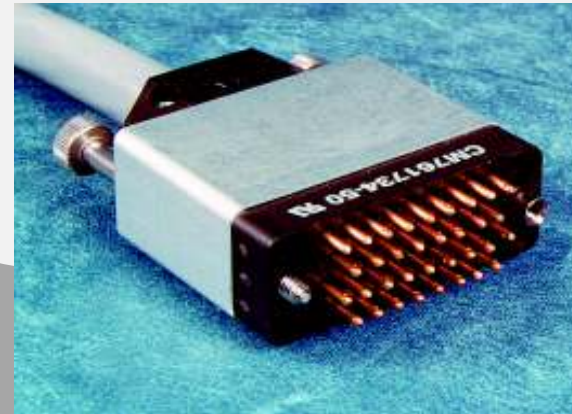

Custom Hybrid cable assemblies with shielding & chokes for low EMI applications. For high speed DSL, ADSL and VDSL applications.

We build assemblies to meet specific criteria and exacting specifications issued by hardware manufacturers.

V.35, RS232 (DB9,15,25), 64 Position , 50 Position Champ®, MS<sup>2</sup>, RJ11, RJ12, RJ45 and Bix® style connectors make up a few of the different connector styles regularly added to assemblies destined for Telco applications.
